Computers in Philately: Exhibiting Surcharges

1. The Att on Sio Surcharges

Siam's 1883 first issue was intended solely for use within the Kingdom. When Siam joined the UPU in 1887, the first regular set of definitive stamps was issued. However, the set lacked a one att value needed to pay the rate for local and inland postards and was issued. I powerly the set takes a one at value needed was used. By mid-1889, however, supplies of this issue were used up. As a result, the Post and Telegraph Department surcharged the one sio value of the first issue by hand stamp to sheets of 80 to cover the original word "sio" in the value tablet with the word "att" (δa). The hand stamps used were prepared from type borrowed from two local printing houses, Bradley's Printing, Publishing and Binding House and the Bangkolem Printing Office and Publishing House, and set up in a compositing stick from which a cast was made for use in printing.

Type 1

Hand stamp surcharge applied by the Post and Telegraph Department in August 1889 using type obtained from Dr. Dan Beach Bradley and Bradley's Printing, Publishing and Binding House. Number surcharged: 80,000. There are three subtypes that are traditionally differentiated by the bottom of the letter "g". However, a close examination of large multiples shows that the surcharges were frequently over- and under-inked. In some cases, the bar is missing or partial due to under-inking. In other cases, the bar appears complete due to over-inking. Thus, identification of the subtypes cannot rely solely on the appearance of the bar between the two loops of the "3". Other identifying characteristics are described below

A - Bar complete. "√" curved upwards and close to the "a". the gap measuring 0.6mm to 0.7mm

B - Bar partial. "~" flatter and C - Bar missing. flat with 0.7mm to 0.8mm from the "a". curled tail. The gap is wider Acute angled shape to the than in the other types, measuring 0.8mm to 1.0mm.

* short tail

bottom of the "s"

Subtype A - Large Block (Positions D1 - J8)

Dr. Bradley Type
